ACKNOWLEDGEMENTS	iii
ABSTRACT (ENGLISH)	iv
ABSTRACT (THAI)	v
LIST OF TABLES	viii
LIST OF FIGURES	ix
CHAPTER I INTRODUCTION	1
CHAPTER II OBJECTIVES	5
CHAPTER III LITERATURE REVIEW	
3.1 Eukaryotic model: <i>Saccharomyces cerevisiae</i>	6
3.2 The effects of ethanol on <i>S. cerevisiae</i>	9
3.3 The cell wall construction	11
3.4 Mechanisms of ethanol tolerance in <i>S. cerevisiae</i>	16
3.5 The Mitogen-activated protein kinase (MAPK) pathways	21
3.6 The cross-talk between the MAPK pathways	29
CHAPTER IV MATERIALS AND METHODS	
4.1 Growth determination assay	33
4.2 Zymolyase sensitivity test	34
4.3 Real-time quantitative PCR	36
CHAPTER V RESULTS	
5.1 Role of the MAPK pathway in ethanol tolerance in <i>S. cerevisiae</i>	41
5.2 Effect of ethanol on cell wall remodeling in the yeast wild-type strain	44
5.3 Effect of ethanol on cell wall remodeling in the mutants lacking genes encoding components of the MAPK pathways	49

CONTENTS (cont.)

	Page
5.4 The expression of cell wall-related genes in the yeast wild-type strain exposed to ethanol	55
5.5 The expression of cell wall-related genes in the yeast strain exposed to ethanol	59
5.6 Effect of hyperosmolarity on cell growth during cell wall stress	63
5.7 Effect of hyperosmolarity on cell wall remodeling and cell wall-related gene expression durng cell wall stresses caused by ethanol and Calcofluor white	65
CHAPTER VI DISCUSSION	70
CHAPTER VII CONCLUSION	76
REFERENCES	79
BIOGRAPHY	87

LIST OF TABLES

Table	Page
3.1 Major components of <i>S. cerevisiae</i> cell walls	14
3.2 Genes required for ethanol tolerance whose expression has been reported to be induced during ethanol stress.	18
3.3 Classification of genes whose deletion confer ethanol sensitivity in <i>S. cerevisiae</i> .	19
4.1 Yeast strains used in this study	38
4.2 Primers used in this study	40

LIST OF FIGURES

Figure	Page
3.1 Life cycle of the <i>S. cerevisiae</i>	8
3.2 The possible target sites of ethanol in yeast cells	10
3.3 The components of the cell wall and the relationship between the cell wall components in <i>S. cerevisiae</i> .	15
3.4 Mechanisms of ethanol tolerance in <i>S. cerevisiae</i>	20
3.5 The MAPK cascades of <i>S. cerevisiae</i>	22
3.6 The glycerol synthesis pathway in <i>S. cerevisiae</i>	26
3.7 Pseudohyphal growths in <i>S. cerevisiae</i>	28
3.8 Model for pheromone-induced activation of the cell wall integrity (CWI) pathway	30
3.9 Model for the cross-talk between the cell wall integrity and HOG pathways in response to zymolyase-mediated cell wall stress	31
5.1 Growth of the mutants lacking genes encoding components of the cell wall integrity pathway under ethanol and cell wall stress conditions.	42
5.2 Growth of the mutants lacking genes encoding components of the pheromone signaling pathway under ethanol and cell wall stress conditions.	43
5.3 Zymolyase sensitivity of the wild-type strain after exposure to various concentrations of ethanol and Calcofluor white.	46
5.4 Zymolyase sensitivity of the wild-type strain after exposure to ethanol and Calcofluor white for various times.	47
5.5 Cell wall remodeling of the yeast mutant strains after exposure to ethanol and Calcofluor white.	51
5.6 Cell wall remodeling of the yeast mutant strains after exposure to ethanol and Calcofluor white.	53

LIST OF FIGURES (cont.)

Figure		Page
5.7	Expression of cell wall-related genes in the wild-type strain under ethanol and Calcofluor white stress conditions.	56
5.8	Expression of cell wall-related genes in the yeast mutant strains under ethanol stress condition.	61
5.9	Growth of the yeast strains under ethanol and cell wall stress conditions with the supplementation of sorbitol.	64
5.10	Cell wall remodeling of the yeast mutant strains after exposure to ethanol and Calcofluor white with sorbitol supplementation.	67
