ABSTRACT

The purposes of this research were to 1) study the problem situation of the participation of the community, 2) to improve the participation of the community, 3) to present the development process with the participation of the community for make the community enterprise master plan in Chaiyaphum province. A participatory action research procedures and basically statistic are research methodology. Two communities in Nernsa-nga district were research area selected.

The findings found that 1) the participation of the community in the arrangement of master plan communities enterprise were faced with the number of people who took part. Because, the members in community does not concern about the importance and lack of awareness of the role. And in their mindset the master plan community enterprise is the role and responsibility of the state government to carry out the community. 2) The development of community involvement, starting from the members of community seeking to provide the knowledge, understanding and awareness. By base of the academics, leaders, and community model network combined with the development. The results of the development process involved community satisfaction collaborative agreement together to extend to the participation of the community with increased performance. The communities were affect confidence and a comprehensive approach to master plan community enterprise activities. But the communities need mentors who provide recommendation and strengthen encouragement. 3) The development process was start by combination three techniques include academics, developers and community leaders to create knowledge, understanding, and awareness together. And members community have activities under the joint agreement of the community.

The policy recommendations is the model community should construct the networking community by serving as mentors to communities were faced with the participation in the arrangement of a master plan community enterprise.
